CHINESE RESEARCH GROUP PRODUCES MOLYBDENUM STEEL

Peiping, 28 August (Hsin-hua) -- The Combined Industrial Research Section of the Central Ministry of Heavy Industry has been successful in the trial production of molybdenum steel. Although China is second in national molybdenum reserves, the lack of facilities for the smelting of alloy metals has forced China to export molybdenum instead of utilizing it within the country.

The Combined Industrial Research Section has been experimenting for the last half-year using the aluminosilicate heating method developed by Vladin, the Soviet specialist.
